

ONLINE MEETING

International Maintenance Recovery by Public Bodies

May 15th, 2024

Due to the proliferation of state support systems in case of default of child maintenance payments and the increase in international mobility of families, the need for cross-border enforcement of maintenance by public authorities is growing. A tension arises between the need for more immediate support for children, for an effective reimbursement of maintenance allowance from debtors and debtor protection, especially when it is no longer the child alone but an authority that asserts maintenance payments. The conference concludes a series of three seminars on the topic of maintenance recovery by public bodies and is intended to provide insight into its socio-political and legal aspects as well as a unique opportunity for an exchange with experts from different fields.
